

RaceDay ERD Validation Checklist

Purpose

This checklist confirms that the RaceDay Entity Relationship Diagram (ERD) was reviewed against the Part 1 requirements before submission.

Entity Validation

Requirement	Status
At least six entities are included	Complete
User entity included	Complete
Event entity included	Complete
EventType entity included	Complete
Category entity included	Complete
Enrolment entity included	Complete
Result entity included	Complete

Attribute Validation

Entity	Attributes Present	Status
User	UserID, FirstName, LastName, Email, PasswordHash, Role, PhoneNumber, CreatedAt	Complete
Event	EventID, EventName, Description, EventDate, Location, Distance, EventTypeID, OrganiserID, CreatedAt	Complete
EventType	EventTypeID, TypeName, Description	Complete

Entity	Attributes Present	Status
Category	CategoryID, EventID, CategoryName, Description, MinimumAge, MaximumAge	Complete
Enrolment	EnrolmentID, ParticipantID, EventID, CategoryID, EnrolmentDate, Status	Complete
Result	ResultID, EnrolmentID, FinishTime, FinishingPosition, RecordedAt	Complete

Key Validation

Primary Keys

- User.UserID
- Event.EventID
- EventType.EventTypeID
- Category.CategoryID
- Enrolment.EnrolmentID
- Result.ResultID

Foreign Keys

- Event.EventTypeID → EventType.EventTypeID
- Event.OrganiserID → User.UserID
- Category.EventID → Event.EventID
- Enrolment.ParticipantID → User.UserID
- Enrolment.EventID → Event.EventID
- Enrolment.CategoryID → Category.CategoryID
- Result.EnrolmentID → Enrolment.EnrolmentID

Relationship Validation

Relationship	Cardinality	Status
User (Organiser) → Event	1 : Many	Complete
EventType → Event	1 : Many	Complete

Relationship	Cardinality	Status
Event → Category	1 : Many	Complete
User (Participant) → Enrolment	1 : Many	Complete
Event → Enrolment	1 : Many	Complete
Category → Enrolment	1 : Many	Complete
Enrolment → Result	1 : 0...1	Complete

Final Validation

The ERD contains the required entities, attributes, primary keys, foreign keys, relationships and cardinality.

The ERD was designed to match the SQL Server database structure and the planned RaceDay API functionality.
