

RaceDay Event Management System

PROG6212 Programming 2B - PoE Part 1

RaceDay is a web-based event management system for South African road running, walking and cycling events.

This repository contains the planning and database work completed for Part 1 of the Programming 2B Portfolio of Evidence.

User Roles

Organiser

Organisers can:

- Create events
- Edit events
- Delete events
- Manage event categories
- View event enrolments
- Capture participant results
- View information relating to events they manage

Participant

Participants can:

- Create an account
- Log in
- Browse available events
- Enter an event
- Select a category
- View their own enrolments
- Track their race results and performance history

Part 1 Deliverables

The following technical deliverables are included:

- Entity Relationship Diagram (ERD)
- API Endpoint Plan
- SQL Server Database Script
- GitHub Actions CI/CD validation
- Database Design Specification
- Project README documentation

Repository Structure

```
